

Join Us

May 17th at the BP Energy Center
For a Pre-Conference
'MINI' Resuscitation Academy.

RACI 12TH
CONFERENCE

The Resuscitation Academy (RA) was the outgrowth of the requests from around the world to the Seattle King County EMS system for the "secret" to their success in perennially providing the highest survival rates from out of hospital cardiac arrest in the world.

We will be bringing experts, faculty and members of the Global Resuscitation Alliance together for this special event. They will be giving us an indepth and shortened version of the intensive 2 day Resuscitation Academy.

This shortened event has been designed to spark interest in options for improving cardiac arrest survival rates locally, statewide and in our own facilities. We will be encouraging questions, and information sharing. Discussing where resuscitation science is taking critical care in the future.

Join us, also, in thanking AFD for a demonstration of local prehospital cardiac arrest care, and assisting with some practical HPCPR hands on training.

Meeting of the Ravens

Following Lunch • 1PM - 5PM

Everyone is invited to attend the Northwest EMS Directors Assembly: A gathering of EMS Directors and members from around the region, to network and share information, and discussion on the future of emergent care in Alaska.

Following the Pre-Conference events, you are invited to join us, the **ACEP Journal Club** and Experts in Emergent Care for a Reception in Eagle River, Starting at 7PM.

Make sure to RSVP in order to attend this special event.
Destination and more details once you RSVP.
