UPDATES IN EVALUATION OF NEONATAL FEVER

Join us for a discussion of two exciting recent articles highlighting new strategies for risk stratifying febrile neonates.

[Validation of the “Step-by-Step” Approach in the Management of Young Febrile Infants](#)-Pediatrics 2016

[A Clinical Prediction Rule to Identify Febrile Infants 60 Days and Younger at Low Risk for Serious Bacterial Infections](#). JAMA Pediatrics 2019

The “Step-by-Step” protocol is a recent strategy that can be used to risk stratify febrile infants and potentially safely decrease invasive workups and hospital admissions. Also promising is a Clinical prediction rule derived by the PECARN group.

Discussion will be mediated by, Dr. Russ Johanson, Mat Su Regional Med Ctr, Dr. Nick Papacostas, VP AK ACEP and Dr. Cliff Ellingson Peds/EM boarded physician and faculty at Providence Alaska Medical Center
